PROJECTS

Arihant Plus

- Worked on this project from scratch.
- The Arihant Plus application developed for those students who are doing preparation for competitive exams ,this Application is providing video courses ,test papers and live classes ,some test papers and video will be free but the main content of this application is paid.
- in this application i lead this project , design all the screens exact as figma for mobile and tablet ,implement some functionality such as charts,svgs,video player ,voice search and more. also did api integrations.

Medicine App

- The Medicine app is basically develope for online order medicines and delivery ,in this project we developed two application one for customers and second one is for shop owners and labs and the delivery partner .
- in this application my role was to design most of the screens and handling customer,vendors and delivery boys data and components with minimized code ,using common components and common states to handle data flow,and did api integration.
- Fixing bugs and fullfill client requirment.

Dayly

- worked on this project as a fresher
- Dayly is mobile application developed using react native that allow user to discover and rate fashion item,share their styles preferences,and connect with other fashion enthusiats ,the app aim to provide a platform for users to explore the latest trends ,receive feedback on their outfits ,and contribute to the fashion community
- In this project my role was to design all the screens using figma using basic stylesheet

Other Projects

- Syte - it is related to cunstructor management
- student projects-some react js projects
- veromoda-it is e-commerece app for shopping
